GeoCodis d.o.o.

Ljubljanska cesta 24B

4000 Kranj

Slovenia

<https://www.geocodis.com/>

Job description:

Developing software solutions in the field of satellite technology, location based solutions, spatial analysis and digital cartography.

Requirements (education, skills, work experience...):

- Basic knowledge of English.
- Experiences using two or more programming languages. At the moment we are using C#, PHP, Python and various web technologies (HTML, JavaScript, CSS).
- Experiences with implementation of software solutions, using relational databases or mobile applications.
- Formal education in computer, informatics or other technical field is an advantage.

Having motivation to learn new technologies and solve new challenges is a big advantage, therefore sign up even if you do not fulfil all conditions or experiences.

Payment/ Salary: From 2000€ gross, depending on experiences and qualification.

Additional information and how to apply:
